COURSE PREVIEW SERIES: SPECIAL TOPICS

CYBERETHICS

Taught by Dr. Glen Miller

Thursday, April 6th

8:00 PM | YMCA 113

Exploration of moral and social issues related to the development and use of computing technologies; investigation of their intersection with ethical and social theories, principles, and values; examination of topics such as privacy, surveillance, security, identity theft, intellectual property rights, censorship, and issues related to justice and globalization, especially as faced by computing professionals.
